

Madison County Road Improvement Record.

MIDDLE PIKE

ROAD PETITION TO CONSTRUCT OR IMPROVE

To The Board of Commissioners of Madison County, Ohio.

The undersigned petitioners, being at least fifty^{one} per cent of the land or lot owners, residents of said County, who would be specially taxed or assessed for the improvement, hereby petition you for the improvement of a public road on the following line, to-wit,-

Commencing at the line between Union and Madison Counties, where the same is intersected by I.C.H.No.241, commonly known as the Middle Pike; Thence following the line of said Middle Pike to the point where said pike is intersected by the corporation line of West Jefferson, Ohio.

Improvement to consist of Draining, Grading and Bridging or culverting where necessary and by placing on grade, when completed, crushed stone and screenings 16.00 feet wide and nine inches deep in the center and six inches at the sides.

The compensation and damages, costs and expenses for said improvement to be apportioned and paid as provided in the subdivision numbered one in section 6919 of the General Code of Ohio. And on the one mile assessment plan described in said subdivision.

Dated this 12 day of June, A.D.1916

You will take notice that the schedule of the apportionment of the
 costs and expenses of the Middle Pike along the following described
 route, viz,-

Commencing at the line between Union and Madison Counties, where
 the same is intersected by I.C.H. No. 241, commonly known as the Middle Pike;
 Thence following the line of said Middle Pike to the point where said Pike is
 intersected by the corporation line of West Jefferson, Ohio, and the estimated
 assessments to be made on the landowners affected, has been made by the Surveyors
 and the same is on file in the office of the County Commissioners for the in-
 spection of all persons interested.

The above improvement shall consist of grading, draining and re-sur-
 facing with crushed stone; also the costs and expenses of said improvement
 be apportioned in accordance with method No. 1 under Section 6919 of the

Madison County Road Improvement Record.

MIDDLE PIKE

General Code of Ohio.

And the 9 day of July, 1917, at 10 o'clock A.M. in the office of the Commissioners of this County, has been fixed as the time and place of hearing objections, if any be made, to said assessment. If any owner of property affected thereby desires to make objection to said assessment, he may file his objection in writing with the County Commissioners before the time set for hearing.

By order of the Commissioners of Madison County.

By Allen R. Blacker, Auditor.

The State of Ohio, Madison County, SS.

I, R.K. Shaw, do solemnly swear that I am proprietor of THE LONDON TIMES, a newspaper printed and of general circulation throughout Madison County, Ohio, and that the original notice, a true copy of which is hereto annexed, was published in said newspaper for the period of two consecutive times, commencing on the 21st day of June, A.D. 1917.

R. K. Shaw.

NOTICE TO CONTRACTORS.

Sealed bids will be received by the Board of County Commissioners of Madison County, Ohio, up to 12 o'clock, noon, on the 8th day of April, 1918, for furnishing the necessary labor and equipment for the improvement of what is known as the Middle Pike between Plain City and West Jefferson and more definitely described as follows,-

Commencing at the line between Union and Madison Counties, wherethe same is intersected by I.C.H. No. 241, commonly known as the Middle Pike; Thence following the line of said Middle Pike to the point where said pike is intersected by the corporation line of West Jefferson, Ohio.

Said improvement to consist of the draining, grading, bridging or culverting, where necessary, and by delivering and placing on said grade, when completed, crushed stone and screenings 12 feet wide and 8 inches deep in the center, and six inches at the side, all to be done according to the plans and specifications heretofore prepared by the County Engineer and now on file in his office.

It is hereby understood that the County Commissioners are to furnish the crushed stone and screenings at the quarry of one Edward Lawrence, said quarry being about 2 miles from said improvement.

Copies of the surveys, plans, profiles, cross sections, estimates and specifications for said improvement are also on file in the office of the County Commissioners,

Madison County Road Improvement Record.

and said work shall be done strictly in accordance therewith.

Each bid must contain the full name of every person or company interested in the same. A bond shall accompany said bid amounting to at least \$1000.00 as a guarantee that a contract will be entered into if awarded. A certified check payable to the Treasurer of said County will be accepted in lieu of said bond.

Checks or bonds of unsuccessful bidders will be promptly returned to their respective owners.

Said work to be completed by November 1, 1918.

The Board of County Commissioners reserves the right to reject any and all bids

MIDDLE PIKE

(I.C.H.No.241 and C.H.No 10)

Located in Darby, Canaan and Jefferson Townships. Being 11.57 miles in length.

May 7th, 1917.

Submitted May 7th, 1917

Time for completion

191

London, Ohio, May 7th, 1917

It is hereby agreed by the undersigned County Commissioners and County Surveyor of Madison County, Ohio, that the Specifications and Estimate for the construction of part of County Highway No, 10 and of Inter-County Highway No. 241, all of which is commonly known as the Middle Pike, as submitted by the County Surveyor, shall be changed and made to read as follows,-

SYNOPSIS OF SPECIFICATIONS.

GRADE.

Width - 26 feet.

To be reshaped and crowned; old metal to be scarified and trenched wide enough to receive the new metal.

Road-bed completed by rolling.

DRAINAGE.

Ditches to be opened to a depth and on a grade sufficient to carry the water to proper outlets at culverts.

ROAD METAL.

Gravel for foundation, where needed.

Crushed stone layer 12 feet wide.

Depth of stone layer, loose, 8 inches at center and 6 inches at sides.

Size of stone $\frac{3}{4}$ inch to $1\frac{1}{2}$ inches.

Crown of grade $8\frac{1}{2}$ inches.

Crown of metal $3\frac{1}{2}$ "

SUBGRADE.

The grade or road bed shall be reshaped to conform to the grade as shown on the profile and to the crown as shown by the cross section drawing.

The berms shall be smooth and evenly finished and the ditches on the sides of the road opened and graded so as to carry the water to the proper outlets at the culverts.

The minimum depth of ditches below the crown of the grade shall be 24 inches. As far as may be possible, the ^{or crushed} gravel / stone now on the road shall be used as a foundation for the new stone layer add for making berms at the edges of the stone layer.

The right is reserved to make any changes in the grade that may be necessary for the preservation of this old foundation course.

At places on the road bed where the old material is not deemed sufficient, a layer of gravel, the depth of which shall be determined by the Engineer in charge of the work shall be put on as a foundation for the stone layer.

This item will be paid for by the cubic yard upon actual measurement of the quantity placed on the road.

The grade and road bed to be thoroughly compacted by rolling before any stone is put on.

Madison County Road Improvement Record.
MIDDLE PIKE

SIZES OF MATERIAL.

Stone shall be of a size passing through a $1\frac{1}{2}$ inch opening and retarded on a $\frac{3}{4}$ inch opening.

ROLLED STONE COURSE.

After the grade and road bed have been prepared and accepted by the Engineer, a layer of broken stone or washed crushed gravel of the approved size and quality, shall be spread evenly over it to the required width and depth, rolled and dry filled as hereinafter specified.

Heavy boards shall be firmly staked at the sides for the purpose of keeping the alignment and depth.

HAND LEVEL AND STRAIGHT EDGE.

The contractor shall provide a hand level and straight edge and crown board of sufficient length to reach across the road at right angles and rest on the side boards; the straight edge and crown board shall be used at all times ahead of where the stone is being dumped, so that the proper crown will be maintained.

If any deficiency is found in the sub-grade, the same shall be remedied by the contractor by adding or removing dirt, or gravel or by making up said deficiency with gravel or stone, which shall be at the contractors expense. Before the side boards are removed, a berme of the old stone and gravel and dirt, if there is not sufficient stone or gravel, shall be placed against the same. This berme and the layer of stone shall be thoroughly rolled not less than 16 inches out with a self propelled roller, weighing not less than ten tons. No rolling to be done when the grade is wet.

DRY ROLLING.

The stone course shall be rolled until the material ceases to sink under or move in front of the roller.

The rolling shall begin with the outside driver covering equal parts of of the metal and shoulder; and the roller shall be run forward and backward along the edge of the metal until the shoulder and metal are firmly bound together.

When the shoulder and the sides of the macadam have been firmly rolled, the rolling shall progress gradually toward the center from each side until the entire course has been thoroughly keyed and the interstices of the metal reduced to a minimum and all settlement has ceased.

Any low place that develop during rolling shall be loosened and then refilled with the same material as that of which the course was constructed and again rolled as above.

APPLYING SCREENINGS.

Screenings, all of which will pass through a ($\frac{1}{2}$) one half inch ring, together with a sufficient proportion of dust of fracture shall be applied.

Screenings to be used at the rate of seven (7) cubic yards to each one hundred (100) feet of stone layer.

All screenings shall be dumped in piles along the side of the road, outside of

Madison County Road Improvement Record.
MIDDLE PIKE

the line of the stone layer, and said screenings shall be delivered in advance of the stone in which they are to be used, as no hauling shall be done on stone that has not been rolled.

The screenings shall be cast thinly with a spreading motion of the shovel from the piles at the road side.

The rolling shall continue while the screenings are being spread, so that the jarring effect of the roller will aid them in settling to the bottom.

The spreading and rolling shall continue until the specified amount of screenings has been applied.

ESTIMATE.

ROADWAY

109674 Sq Yds shaping roadbed @ \$.04	\$4386.96
62460 lineal feet repairing shoulders, slopes and ditches (both sides) @ \$.04	2498.40
